## **DETAILED ACTION**

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claim1, 3-5, 7-14 and 16-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Hiroshi Hasegawa et al. (A voltage source PWM inverter system characterised by Sinusoidal output voltage with neither common mode or normal mode voltage-Design and performance a point EMI filter paper)

Hasegawa et al. disclose a filter device for suppressing EMI in Fig. 1. A common mode choke (Lc), motor (IM), resistor (Rc) and capacitor (Cc) connected at the neutral point of the alternating current load (point where all the resistors (R) commonly connect) and the reference potential point of the power system (n).

## Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/534,250 Page 3

Art Unit: 2838

5. Claims 1, 3-5, 7-14 and 16-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miyano Kensuke (2001245477) in view of Ayano et al. (6,377,479).

Kensuke discloses the claimed invention except for a common mode choke.

Ayano et al. teach the use of a common mode choke in a power conversion system in Figs. 1 and 8-11. Kensuke discloses a power converter in Figs. 1, 5, 13 and 15. AC input (1), rectifier (2), neutral point of the power source (3), inverter (4), motor (5), neutral point of the alternating current load (where C2 connect to the motor), capacitor (C2) and resistor (R1/R2). It would have been obvious to one having ordinary skill in the art at the time of the invention to provide a common mode choke as taught by Ayano et al. in Kensuke power converter system in order to suppress the high-frequency noise interference.

## Response to Arguments

6. Applicant's arguments with respect to claims 1, 3-5, 7-14 and 16-23 have been considered but are most in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Adolf Berhane whose telephone number is 571-272-2077. The examiner can normally be reached on Monday- Friday 8 AM to 6 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Akm E. Ullah can be reached on 571-272-2361. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
